# Steps to TSP: Homemade Guide

Please note: Think of this guide as a snapshot in time. It was written in 2026 based on lessons learned in 2025. While it may still be helpful, processes may have changed since then, and this guide is not intended to be continuously updated.

## Enroll as Microsoft AI Cloud Partner

It consists of 2 steps, the [account creation process](#) and then the [account verification process](#).

### Account creation

#### Step by step process

1. Select Partner type:

The screenshot shows the Microsoft Partner Center interface. At the top, there's a header with the Microsoft logo and 'Partner Center'. The main content area has a white box with the title 'How would you like to partner with Microsoft?'. Below the title, it says '(Select one or more)'. There are seven checkboxes with corresponding descriptions: Partner to find the solutions and resources you need to grow your business, demonstrate your proven expertise in competencies and specialized areas of business. (Microsoft AI Cloud Partner Program); Build commercial software, applications, and add-ins that run on Microsoft products. (Independent Software Vendor, ISV); Deliver value added, outsourced IT services. (Managed Services Provider, MSP); Resell or distribute Microsoft products, or enable a partner channel. (Reseller or Distributor); Integrate solutions, create custom solutions, or consult on Microsoft products. (Systems Integrator, SI or Consultant); Manufacture devices, parts and equipment. (Original Equipment Manufacturer, OEM); Develop consumer applications like Xbox Games and Windows Apps. (Consumer Developer). At the bottom of the box is a 'Next' button. Below the box, there are links for 'Contact support' and 'Privacy & cookies'.

2. Login with work account: Use your primary contact email address. After the primary contact verifies the email address, we continue our review of the information provided. Verification usually **takes three to five business days**.

The screenshot shows the Microsoft Partner Center 'Welcome to Partner Center' screen. At the top, there's a header with the Microsoft logo and 'Partner Center'. The main content area has a blue box with the title 'Welcome to Partner Center'. Below the title, it says 'Partner Center is the single destination for your organization to manage your business relationship and partnering opportunities with Microsoft, customers, and other partners. Get started with setting up your account by choosing one of the options below. [Learn More](#)'. Below the blue box, there's a white box with the title 'Registration steps for Microsoft Cloud Partner Program'. There are three checkboxes with corresponding descriptions: Use the work email address that you use to log in to Office 365, Microsoft Azure, or Microsoft Dynamics CRM (for example, you@yourcompany.com); Review your account information and agree to the terms and conditions; Take the tour to explore the Partner Center dashboard and start managing your membership. Below the first checkbox, there are two buttons: 'Login with work account' and 'Create work account'.

3. Creating an account does not make you automatically a Microsoft AI Cloud Partner. There's more! I have had an account in the partner center for years now, but I am Microsoft AI Cloud Partner since 2025.

## Things you will need

- **Primary contact person (name + business email address)**
- **Email address (extremely important)**
  - The primary contact email address must be a company work email address OR a Microsoft 365 work account, for example, [you@yourcompanyname.com](mailto:you@yourcompanyname.com)
  - The email address domain must belong to your company and you should be able to probe it (i.e. with invoices from hosting/domain provider)
  - For more information about email addresses, see [Your company work account and Partner Center](#).
- **Authority to sign legal agreements**
  - Ensure that you're authorized to sign legal agreements on your company's behalf because you're asked to do so during the enrollment process.
- **Legal business name and address for your company**
  - The street address and postal code must match the address on record.

## Verification

Duration: Officially, based on Microsoft instructions, it takes 3 to 5 business days.

### Step by step process

From verification started up to business owner verification, the process can take up to 6 weeks. Here the main milestones of my own process:

- March 11: Verification process started on March 11.
- March 17: Email asking to complete more information.
- In April, open a support ticket which was stocked for several weeks
- May 20: I added a reply to the Microsoft Vetting post at Tech Community. That literally saved me to wait for another 6 weeks.
- June 5: my business got the Microsoft AI Cloud Partner authorized status
- Authorized status confirmed on Microsoft Partner Portal

## This you will need

- Patient
- Provide documents that prove your company is legal, and your domain belongs to your company. Documents like invoices from your domain provider and commercial registration documents of your business are indispensable for the verification process to get to authorized.
- If your process is taking longer than expected, open a support ticket. If the support ticket remains unattended, look other ways to ask for help, like MCT Portal (but this should be really like your last resource).

## Training Service Provider

Once you are an authorized Microsoft AI Cloud Partner, you can go ahead and submit your application as [Training Service Provider](#). Honestly, if you already survive the enrollment as MS AI Cloud Partner, you will do great with this second step.

### Step by step process

1. Fill in this [Microsoft Forms form](#).
2. Be prepared to answer questions like this:

6. What are your organization's goals in partnering with Microsoft's Training Services Partner ecosystem? \*

7. In what geographic regions or markets do you currently deliver instructor-led training?

example: Europe, Brazil, Worldwide, etc. \*

8. What do you consider the key training differentiator(s) for your organization?

example: extensive coverage in a specific market or region, training expertise in a specific area, a history of quality training in a specific industry, layered services for job placement, etc. \*

9. What training modalities does your organization currently leverage? (Select all that apply) \*

☒ Online / virtual

☒ In-person (classroom)

☒ Blended (online and in-person)

☐ Sonstiges

10. Do you have Microsoft Certified Trainers associated with your organization to start training on Microsoft Courses? \*

☒ Yes

☐ No

11. Approximately how many students do you intend to deliver official Microsoft training to in the next 12 months? \*

3. Wait. I submitted on June 12 and this welcome mail arrived on June 18.

## Welcome to the Microsoft Training Services Partner Program!

We have received your submission of the Training Services Partner (TSP) intake form. The TSP program is open to all organizations who meet basic customer training requirements. We recommend you thoroughly review our onboarding documentation in the [Getting Started collection](#) on the Learning Resources site to familiarize yourself with program requirements and benefits. Please note that processing of onboarding activities (see below) can take up to two weeks.

**Let's Get Started!** Below are operational onboarding activities that you'll want to complete in advance of your first training engagement. Once these capabilities are active you may begin delivering official Microsoft training.

- **Register for Microsoft Learn Admin Access** – this enables you to generate the required achievement codes that you will distribute to every learner who completes an official Microsoft training. These codes unlock learner badges on the Microsoft Learn platform. More information on achievement codes can be found on the [Learning Resources site](#).
- **Create a Metrics that Matter survey account** – post-training survey distribution is a requirement of the program and provides you learner insights into the quality of your training courses.
- **Register for Pearson Vue and ALH accounts** – this enables you access to discounted Microsoft Certified Professional (MCP) exam vouchers from the Pearson Partner Store and labs from our Lab Hosters (LH's). Follow these links for more information on [accessing exam vouchers in the Pearson Partner Store](#) and [Lab Hosters](#).
- **Familiarize yourself with the TSP dashboard on Partner Center** – while logged into [Microsoft's Partner Center](#) platform you can access your program

### Things you will need

- Duration: Plan for 6 business days
- Prepare to answer business relevant questions
- Don't forget to save the form after submission for future reference
